The University of Victoria Particle Physics Group invites applications for a Postdoctoral Fellow position working on the ATLAS experiment at the CERN LHC.

The ATLAS group at Victoria consists of over twenty-five scientists including six faculty members -- Justin Albert, Richard Keeler, Bob Kowalewski, Rob McPherson, Michel Lefebvre and Randall Sobie -- making significant contributions to ATLAS liquid argon calorimetry, muon spectrometer, high-level trigger, computing and physics analysis. The group is also active in the design and construction of upgrades of ATLAS liquid argon calorimeter electronics and the new small wheels for the muon end-caps.

**The successful candidate will be expected to take a leading role in the ATLAS New Small Wheel (NSW) upgrade project, initially with emphasis on the CERN-based testing, integration and commissioning of the small-strip thin-gap chambers (sTGC) and then the full NSW.**

The candidate should have completed a PhD by the time of the appointment. Experience in particle detector design, construction, readout electronics, data-acquisition and data analysis would be useful for the position. **The position will be based at CERN.** The starting date will be negotiated with the successful candidate.

Candidates should send a CV and arrange to have at least three letters of recommendation sent to:

Professor Rob McPherson  
Dept. of Physics and Astronomy  
University of Victoria  
PO Box 1700 STN CSC
