

Post doc position on ATLAS at CERN

Job description:

The ATLAS group at the Technion and at Weizmann invites applications for a joint **postdoc position to be stationed at CERN**.

The Group contributed to the detector construction and operation of the muon endcap Thin Gap Chamber trigger system and to the upgraded sTGC.

Our data analysis activities are centred around BSM searches and in the scope of this position we are focusing on analyses with leptons.

The successful candidate is expected to take a leading role in data analysis. This also involves close communication with the involved parties from the muon community as well as the trigger system. The position offers the successful candidate the possibility to participate in our upgrade activity.

Applicants should have a doctoral degree in physics and should have demonstrated excellent skills in data analysis. They should be strong team players and possess excellent communication skills.

To apply please send your CV and arrange for at least three letters of reference to be sent to:

Yoram.Rozen@cern.ch

Shikma.Bressler@cern.ch
